

# High Frequency Laminate Processing

Our defense, automotive, and telecommunications clients use high-frequency laminates in printed circuit boards, antennas, polarizers, and dozens of other applications. E-Fab has been working with these highly-sensitive materials since the company's earliest days, helping many of Silicon Valley's up-and-coming tech companies innovate and grow.

## E-Fab's High-Frequency Laminates Processing Expertise

We have decades of experience processing high-frequency laminates, supplying customers with reliable and durable parts for their final builds.
