RE: Transition and Continuity

Dear Customers:

As you know, Towne Technologies has ceased accepting new orders and will be closing its New Jersey production facility. You – and all of our customers – are extremely valued, so it's been a personal priority for me to maintain the continuity of your parts supply. I am happy to announce that I will be transitioning Towne's business operations to E-Fab, a compatible manufacturer which is led by Prathima Kapa.

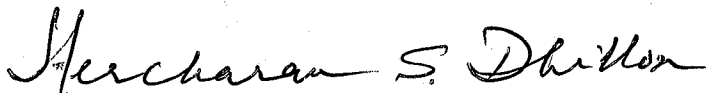

E-Fab (www.e-fab.com) is located in Santa Clara, CA and has been in business for almost 40 years. The company provides engineered solutions across multiple industries, including aerospace, defense, medical, electronics, laser technology, semiconductor, automotive, pharma/biotechnology, and renewable energy. E-Fab also works with other high-tech original equipment manufacturers (OEMs) on their cutting-edge new products and designs. E-Fab has also recently expanded their operations, adding an additional building next door to accommodate the Towne Technologies equipment which it has purchased.

Prathima is the President of E-Fab. She has a degree in Chemical Engineering and a Masters in Molecular Science and Nanotechnology. She has been a thought leader in our industry for over 15 years. I am training her and her colleagues on our procedures and processes to further ensure your needs will be met. You will be in the most capable of hands.

Over the next few weeks, I will be making formal introductions to you and Prathima and her team.

It has been my pleasure to serve you throughout the years. I'm grateful for the trust you've put in our business. Wishing you continued success.

Sincerely,

A handwritten signature in black ink that reads "Hercharan S. Dhillon". The signature is written in a cursive style with a large initial 'H'.
